Symbol Starting Price Industry	Stock Name and Description 
FCGC \$1.15 Mining	<p>Frontier Copper & Gold is a Canadian mining firm whose main focus is the Streak Project in the Yukon province. The Streak Project centers building a mine to access copper, gold, and silver deposits in a region about 120 miles southwest of Fort Selkirk. Conservative estimates suggest that the site contains 14.8 million ounces of gold, 8.6 billion pounds of copper, and 123.9 million ounces of silver in proven & probable reserves. If approved, the mine will process 120,000 tons of ore per day (over 48 million tons per year) over the course of its anticipated 22-year lifepan. Frontier Copper & Gold is debt-free and is strategically backed by a British mining & metals corporation called Eversham - the third-largest such company in the world.</p>
GRI \$1.53 Mining	<p>Gold Rush, Inc. is a mid-tier American mining company with active mines in Canada, California, and Mexico. Founded in 1980, it previously mined gold, silver, and copper in New South Wales, Australia, and Imperial County, California. Gold Rush's stated mission is to be a "leading intermediate gold producer" while promoting mining practices that are environmentally responsible and sustainable. The company's active Canadian mine is in eastern British Columbia, and it has produced between 67,000 and 103,000 ounces of gold each year since 2015. Their mine in California has produced between 113,000 and 134,000 ounces of gold annually since 2017. And the company's mine in Mexico has produced 224,000 ounces and 231,000 ounces of gold yearly since operations started two years ago.</p>
HPA \$312.00 Social Media	<p>Headquartered in Silicon Valley, HallPass went public in 2011 and is currently the largest and most influential social media company in the world. With somewhere in the neighborhood of 2.9 billion users, HallPass lets people and businesses create pages filled with posted pictures and shared thoughts, and its users enjoy the chance to reconnect with old friends and find new online communities with common interests. Though HallPass was adopted early by college students and young professionals, its base now skews older, and the company is growing faster outside the US than in it. Almost all of HallPass's \$90 billion in annual revenue comes from advertising. In recent years, the company has come under fire for sharing user data with online marketing companies, leading to privacy concerns, and for failing to crack down on the widespread dissemination of misinformation.</p>
PSTR \$79.14 Tech (Gaming)	<p>Play Star was founded by a handful of video game developers who had worked for a company called Tacona, which produced one of the first and most popular home video game consoles. Play Star's founders were upset by the way they'd been treated at Tacona, and they believed their best ideas for games were being overlooked by bosses who didn't truly understand what customers wanted or what video games could be. The next 30 years would prove Play Star's founders correct, as Tacona blundered its way into bankruptcy and Play Star thrived. Its developers created more than two dozen of the most iconic and beloved video games in history, and the company was one of the first to recognize the feasibility of developing the same game for multiple different gaming systems. Consequently, Play Star became the darling of gamers regardless of whether they owned an Atari, Nintendo, or Sega product. Between 2006 and 2018, Play Star also acquired some 15 smaller video game development companies, further bolstering its value, importance, and influence.</p>

RVR \$390.77 Entertainment	<p>Rivver is the largest streaming service in the world, boasting of some 215 million subscribers in 190 countries. The company started as a video-rental service that mailed DVDs to customers, but capitalized on the overall improvement of home internet service to launch its streaming operation in 2006. Two years later, thanks to rising subscription numbers, Rivver began bolstering its library and burnishing its reputation by producing a number of its own popular television shows and films. Its willingness to foster innovation while allowing creative people to maintain control of their projects (along with its growing global presence) has made Rivver a beacon for writers, directors, and actors from all over the world. The company now has its own animation studio, and it is in talks with both the NBA and the English Premier League on deals that would allow Rivver to live-stream basketball and soccer games. Shows and films on Rivver are always ad-free.</p>
SO \$84.55 Energy (Oil)	<p>Sargent Oil, which is headquartered in Dallas, Texas, is a multinational company that engages in the exploration, development, and distribution of oil, gas, and petroleum products. It produces crude oil and natural gas, manufactures and trades products, and researches and develops petrochemicals. Sargent Oil is one of the largest of the world's "Big Oil" companies, producing over 4 million barrels a day, making it responsible for 3.2% of the world's oil production. The company also has 33 refineries in 19 countries, and it is the eighth largest oil refiner on Earth. Sargent Oil, though the result of several different mergers over the last century and a quarter, is essentially a great-grandchild of Standard Oil, which was founded by John D. Rockefeller in 1882.</p>
TM \$281.05 Machinery (Heavy Equipment)	<p>Tom Monroe manufactures agricultural machinery and heavy equipment, including engines, combines, drive trains. It also makes lawn mowers. Its tractors are hugely popular, and all of the company's products enjoy a reputation for expert craftsmanship and durability. Its harvesters dominate the American market, and its construction equipment is ubiquitous on job sites around the world. During the Great Depression, Tom Monroe cemented its position as one of the most beloved companies in the United States when it announced that it would not - under any circumstances - repossess any of its equipment from American farmers. When the US entered World War II, Tom Monroe was the first company to announce that several of its factories would immediately shift to produce machinery for the American military, and it kept that promise by producing fully 25% of all the tank engines and transmissions used by the US Army during the conflict. Though the company has factories in Bolivia and Germany, about 70% of its workforce is in the United States, and Tom Monroe's headquarters remain where they've been since the company's founding: Cedar Rapids, Iowa.</p>
TVK \$10.13 Entertainment	<p>In addition to producing television programs, TV4Kids provides domestic and international merchandise licensing, product development consultation, and web site development in the children's entertainment space. The company's corporate headquarters are in New York City, but it has international offices in London, England, and Sydney, Australia. TV4Kids was founded by Andy Grasn timer, a long-time writer and producer at Hannah-Barbera, with the goal of producing shows for children that were socially conscious. Its most popular show today is Bubbles McGee, which tracks the adventures of a nine-year-old girl who can travel through time, but has no control over her destinations. The show, which is in its 6th season, airs in over 50 countries, while older episodes stream on Rivver.</p>
BUH \$68.25 Restaurants	<p>Burger Heaven, which started as a food truck in New York City, is a quintessential American success story. Within two years, the owners of the truck had opened a brick-and-mortar location in Greenwich Village that became a phenomenon when it won a prestigious James Beard Award in 2015. Within 18 months of receiving the award, there were Burger Heavens in Chicago, Los Angeles, and London, and the company had plans to open out posts in Cape Town and Sydney. The next year -- 2018 -- Burger Heaven's IPO made headlines when its valuation hit \$1.6 billion after the initial offering, and it signed several contracts with airports to open franchises in terminals. As of last year, Burger Heaven owned and operated 250 locations globally.</p>

PDG \$53.70 Bicycles	Pental Group International is a Dutch company that designs, develops, produces, and sells bicycles, bicycle parts, and accessories, as well as strollers. Founded in the 1920s, the company dominated the European market until the outbreak of World War II, at which point its husband-and-wife founders famously helped as many of its workers to escape to England or America as possible. Even after the Nazi's invaded the Netherlands, the couple continued to risk their lives to hide Jews in their factory and their own home. After the war, they were nearly broke, but managed to rebuild the company thanks to a widespread network of people who appreciated what the founders had done during the conflict. Today, the Pental Group is the largest bicycle company in Europe and the third-largest in the world, as well as a leading seller of e-bikes.
RAD \$0.85 Publishing	Reese & Daughters is an American publishing house founded by Caroline Reese and her two daughters, Merrill and Evelyn, during World War I. The company hit the ground running, immediately publishing some of the best (and most controversial) works by American and European authors, including several prominent figures in the Modernist movement, in the early 1920s. Though some of these books were deemed to be obscene, the scandal around them invariably drove curiosity among readers and high sales numbers for Reese & Daughters. Between the World Wars, the company grew its stable of writers, attracting bohemian poets from Greenwich Village in New York and a sizable number of Asian writers who hoped to break into the American market. Today, Reese & Daughters is considered a relatively small publishing house, but one which still carries with it an imprimatur of good taste.
BLAB \$47.22 Pharmaceuticals	Breva Laboratories is a mid-cap Indian pharmaceutical company that makes and sells pharmaceutical generics, formulations, and pharmaceutical alternatives known as nutraceuticals in India and internationally. Over the last ten years, 75% of its revenue has been generated in India while the rest has come via offshore sales. Breva has developed a portfolio of more than 650 branded generic drugs, 22 of which are among the top 100 brands in India. It has also filed more than 150 Abbreviated New Drug Applications (ANDAs) with the Food and Drug Administration in the United States. The company has 20 manufacturing facilities -- 17 in India and three in the US --and it also boasts of five different research and development centers, where over 500 scientists work.
ALDS \$61.02 Funeral services	Allman Services started as a small network of funeral homes and cemeteries in the Twin Cities area in 1960. Over time, the company gradually expanded into the rest of the Midwest and the Great Plains. By 1985, the year the company went public, there were Allman Funeral Homes in 23 states. In 1996, Allman Services acquired two of its biggest competitors in the Pacific Northwest and Texas to become one of the three biggest companies in its industry. Today, Allman Services operates more than 2,000 funeral homes and 500 cemeteries, as well as 150 crematoria and three insurance subsidiaries. In terms of its day to day operations, the company offers services related to funerals, internment, and cremations, including the use of viewing facilities and hearses, the arranging and directing of memorials, and providing personalized burial options.
AMXI \$134.54 Insurance	Austin Maxwell Insurance is a collective of mutual insurance companies in the United States with corporate headquarters in San Diego, California. The company was founded by its namesake in 1924, and today is the biggest provider of property, casualty, and auto insurance in the nation. It is also the 40th largest American company by revenue. Austin Maxwell relies on an army of agents who can only sell Austin Maxwell products to sell its insurance. Though it began by insuring automobiles only, specializing in offering rural Americans better rates than competing firms, Austin Maxwell expanded into homeowners and life insurance during the 1930s and 1940s. It also began offering banking and financial services to its customers in the 1990s. Today, Austin Maxwell services 82 million policies in the United States. That includes more than 45 million for cars, 28 million for homes, 8 million life insurance policies, and roughly 1.8 million bank accounts.

NWB \$15.29 Food Production	NoWay Burger is a producer of plant-based meat substitutes whose products first hit the American market in 2014. The company uses pea-protein to craft vegetarian-friendly burgers, steaks, and sausages, which it touts as both healthier for people and better for the environment, as well as indistinguishable in taste and texture from true meat products. A 2018 study that NoWay Burger commissioned found that it takes 88% less land, 94% less water, and 47% less energy to produce a NoWay Burger than a traditional burger. In recent years, the company has signed agreements with major sports arenas, fast food restaurants, and national grocery store chains to sell NoWay Burgers.
RXW \$8.99 Healthcare	RxWeb is an American healthcare company that operates a telemedicine platform, as well as a website and a mobile app that track the prices of prescription drugs in the United States. RxWeb's platform lets people consult with doctors online and even obtain certain prescriptions for a membership fee of \$25 per month, whether they have health insurance or not. The platform also offers a number of medical testing services, though these can vary widely in price. Finally, RxWeb's platform offers coupons for certain medicines, allowing customers to purchase them at healthy discounts in many cases. Even if it cannot offer customers the opportunity to buy medicines at a discount, the platform, website, and app can all still direct people to those pharmacies that offer the lowest prices. To do so, RxWeb uses a proprietary algorithm to scan drug prices at more than 90,000 pharmacies all across the United States. As of last year, RxWeb's site received about 18 million visitors per month, and its app had been downloaded 24 million times.
SFLY \$7.44 Security & Safety	Safely offers electronic security services to homes and businesses, both large and small, as well as fire and carbon monoxide protection to its customers throughout the United States and Canada. The company's corporate headquarters are in Rhode Island, where the business began more than 130 years ago as American Telegraph and Communications, Limited. After the home of the company's founder was burgled in 1902, he commissioned the first ever telegraph-based alarm system, which he offered to his friends and neighbors in Pawtucket, as well. The system connected each person's home to a central monitoring station, and thus the first true home security company was born. By the 1930s, American Telegraph and Communications had added fire alarms and other monitoring services, while largely phasing out its communications operations. It was re-christened Safely in 1960, and it was first traded on the New York Stock Exchange in 1963. In the decades since, the company has grown to become the leader in its industry, acquiring or bankrupting most of its regional competitors along the way.
NYVC \$39.90 Newspapers	The New York Voice Company is the publisher of The New York Voice, a daily New York City newspaper with over 950,000 print subscribers and 11.3 million users with digital subscriptions. The Voice, as it is commonly known, is considered to be the paper of record in the United States, and it is one of the most widely-read and respected news outlets in the world, its writers having won a total of 144 Pulitzer Prizes. The New York Voice Company also operates a number of blogs devoted to various topics, including sports, technology, and food, along with publishing a monthly review of books. These blogs are also subscription-based.
